Have fun reading the news ...

Greetings from Oberursel
Your tec5 Team

Precisely Timed. Faster.

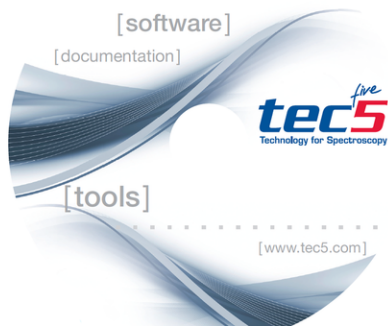

tecSpeed from tec5 is entering previously unrealisable application areas. Exact end point measurements, reaction kinetics or LIBS, only to name a few examples, take advantage of high-speed measurements.

Ultrasonic Levitator – It's a kind of magic

The new generation of the Levitator Control Unit offers improved usability and new features in a fresh appearance. More stability and performance of the acoustic field, text messages inform about the operational status on a high-quality display.

New Software Releases

With the new release the SDACQ32 and SDPROC32 SDK now support the CFE electronic for CMOS detectors. MultiSpec® Pro II now supports switching between different SensoLogic Applications for batch processes.
